- **DevOps & Platform Engineer** with 5 years of CI/CD and release automation in a global software company
- **Owned CI/CD and releases** for 150+ repositories (Java/Spring, C/C++) on Linux, Unix, AIX, Windows
- **Hands-on with** Jenkins, Python, Groovy, AWS, Docker, Kubernetes, Node.js, TypeScript and MongoDB
- **Building internal products end to end** since 2024, from APIs to UI, with AI-assisted development
- **Self-starter and team player**: builds tools that speed up the team beyond daily duties; guides teammates

Technical Skills:

CI/CD & DevOps: Jenkins (Jenkinsfiles, reusable pipelines), Maven, Git, GitHub, Bitbucket, Artifactory
Environments: Linux, Unix, AIX, Windows
Languages & Frameworks: Python, Groovy, Bash, PowerShell, TypeScript, JavaScript, Node.js, React
Cloud & Infrastructure: AWS (EKS, ECR), Docker, Kubernetes
Data & Integrations: MongoDB, REST APIs, Server-Sent Events, Jenkins API
AI: LLM agents and APIs, Cursor

Professional Experience:

2021 – 2026 **DevOps Engineer, BMC Software**

- **Founding member of the group's DevOps team**, serving 40+ developers and managers: built and ran the group's build and release infrastructure as the team grew
- **Owned build and release engineering** for 150+ Java/Spring and C/C++ repositories across concurrent release streams: compilation, packaging, artifact promotion, testing and delivery
- **Delivered urgent customer patches** to production, side by side with developers
- **Built CI/CD automation** in Groovy, Python, Bash, PowerShell, Jenkinsfiles and Maven
- **Created reusable Jenkins pipelines** and shared automation with dependency and version governance (Git, GitHub, Bitbucket, Artifactory), cutting manual release work
- **Integrated CI/CD with the central DevOps platform** on AWS (EKS, ECR) and Docker for automated testing; AWS Certified Solutions Architect – Associate (2021)
- **Initiated and built internal web products end to end** since 2024 with AI-assisted development (Cursor, LLMs): Node.js/TypeScript, REST APIs, MongoDB and React

Selected Projects:

2024 – 2026 **Engineering Operations Dashboard** | Internal product, BMC Software

- **Replaced bookmarks and one-tab-per-job checks** with one live view of every build, project and team across several Jenkins servers, the first tool of its kind in the group
- **Adopted by several teams** in a group of 40+ developers and managers; many open it first thing every morning, next to Jira, and the group's managers use it for a top-down view

Node.js, TypeScript, MongoDB, Server-Sent Events, Jenkins, GitHub

2025 – 2026 **AI-Assisted CI/CD Analysis** | Internal product, BMC Software

- **Used by the team on failed builds** that took an hour or more to investigate by hand: the agent reads the log, rules out Jenkins problems, searches the code and returns the root cause with a proposed fix as a diff

Node.js, TypeScript, MongoDB, LLM agents, Jenkins API, GitHub, REST APIs

2025 – 2026 **Shirat HaLeviim** | Volunteer project as synagogue gabbai

- **Weekly prayer boards from a short phone form**, used every week since launch: replaced over an hour of manual Illustrator work, almost a full day before a holiday

React, JavaScript, Tailwind CSS, Hebcal API, Canvas export

Education:

2020 – 2021 **Practical Software / DevOps Engineering**, ORT Colleges
2021 **DevOps Bootcamp**, develeap

Military Service:

Combat soldier and company medic, Armored Corps; active reserve duty as a combat battalion medic

Languages:

Hebrew – Native | **English** – Fluent
